

# SHARING OUR EXPERIENCE AND EXPERTISE AT THE INAUGURAL AFRICA CLIMATE SUMMIT.

The ongoing inaugural Africa Climate Summit, which has brought together about thirty thousand participants from all over the world, aims to address the increasing exposure to climate change and its associated costs, both globally and particularly in Africa.

The summit is providing a platform for policymakers, practitioners, businesses, and civil society to exchange experiences on climate solutions. Further, it seeks solutions to overcome barriers to curbing climate change and share opportunities realized in different regions.

Being one of the leading companies in the Manufacturing Sector in East Africa, EABL is actively participating in the Summit.

Represented by our Group MD & CEO, Jane Karuku, and our Group Corporate Relations Director, Eric Kiniti, EABL is featuring in various high powered speaking platforms.

Yesterday, Jane featured at a unique panel session titled, 'Reaching Net Zero for African Businesses'. Featuring alongside H.E Dr. Amany Asfour - President, Africa Business Council, and Dimeji Olaniyan - Senior Vice President, Strategy and Sustainability Africa, Airtel, Jane shared EABL's commitments to net-zero by 2030, and gave tangible data on the progress we have made so far since our Sustainability Strategy, 'Society 2030: Spirit of Progress' was launched in 2020.

On his part, Eric participated in a session titled, 'How Kenya can Leapfrog to a Low Carbon Economy.' Eric's speech extensively covered EABL's investment in Biomass and the positive impact thereof. He also shared best practice on the Rudisha project and how it will significantly enable us to achieve our zero waste to landfill targets.

EABL's experience and examples, shared at both sessions, were well received and created a positive discussion from the audiences. Subsequent sessions are scheduled for today and tomorrow respectively.

Today, Eric will feature in a panel session titled 'Nature Positive for Climate Action: Understanding the climate-nature nexus and how corporate commitments can help.' Tomorrow, Jane will feature in a panel discussion titled, 'Nature as the backbone for Climate and Biodiversity Solution'. We will continue to keep you updated on our participation at this unique summit.  
**Regards,**  
**The Sustainability Unit.**
